

## Who we are

GreenBug Energy designs, manufactures, installs, operates and maintains Archimedes screw generators for low head micro hydro sites and related industrial energy recovery applications between 1 and 500kW in size.

## What we do (key results and impact)

We make micro hydro-electric projects with heads between 1 and 10 meters financially profitable while reducing greenhouse gases and improving fish passage

## Why we are unique

We enable you to take action to improve the environment and to harness the value of your site risk free without becoming a water power expert by assuming the cost and risk of development and allowing you the option of buying into the project in addition to paying you 8% of operating income for lease of your site.
